Context

Desktop GUI application
development

Software Engineering
Principles

Motivation

Practice Java
Object-Oriented-Programming

Interactive UI

Problem

Develop Minesweeper

Allow Setting Customization

Persistence Saving-Loading

Requirements

Interactive gameplay

Save and Load feature

Menu and Cold reloaded Preferences

Multiple Language Support

Multi Module

Approach

Java 17

JavaFx

Git → *version control*

Maven → *dependencies management*

Iterative incremental

Approach

Back end

Service: *Game Logic (DefaultGameService)*

Model: *Game State (GameModel)*

Persistence: *Game Repo , preference Repo (Json, AppPreference)*

Approach

Front end

View: *UI JavaFX (MenuBar, GameBoard, Feedback, Dialogs)*

Controller: *GameController , MenuController unifies game events and user input*

Model: *delega backend Model (GameUiModel)*

Approach

Approach

Demo

Conclusions
